TxBox

Base in 2U format, transmitting 8 full-duplex audio channels between its 8 analog inputs/outputs and the Digitear digital network.

- Provision of 8 full-duplex channels on the Digitear network
- Controls via a navigation keyboard and visualization on LCD screen
- Accessible main functions:
    - . analog audio inputs and outputs gain
    - . level of latency/robustness of the radio signal
    - . see Beltpacks and InEars battery levels
    - . see input and output audio levels
    - . see connection status
- Remote control from a PC application connected to the network
- GPO activation triggered by talkback from Beltpack
- Ethernet connector with PoE for powering an AccessPoint

Format: Rack 19''- 2U -250mm - Weight: 4 Kg – Power supply by external module 110-220V / 12 V - 4,2A.
Reference: DE-DS
